

Assessment, Improvement, Measurement (AIM) Report: 04/03/2013**Plan Year:** 2011-2012**Unit:** Practical Nursing**Coordinator(s):** Brenda Willoughby, Evelyn Grigsby, Karman Wheeler, Karen Mayo**Reviewer:** Karen Mayo

Objective or Outcome	Measure(s)				
	Measure Text	Achievement Target	Results	Achievement Target Result	Use of Findings/Next Steps
SLO 1 - Design a plan of care to meet patients needs	Evaluation at practicum	90% of students completing practicum will have developed a satisfactory care plan, evaluated by clinical instructor	100% of the students were able to complete a satisfactory care plan as evaluated by the clinical instructor.	Met	Clinical hours are being changed from 6 to 12 hours. This will provide student's an atmosphere comparable to the work setting and maximizing the time spent at clinicals. The longer time spent during a day will aid students in developing care plans by maintaining continuity and more efficient and effective use of time.
SLO 2 - The PN graduate will demonstrate critical thinking skills by being able to make reasonable clinical judgments through the use of the nursing process.	Utilize the critical thinking components of the PN Final Clinical Evaluation Form.	80% of PN students will achieve a satisfactory rating on the critical thinking components of the PN Final Clinical Evaluation Form.	100% of the PN students who passed the PN courses achieved a satisfactory rating on the critical thinking components of the PN Final Clinical Evaluation Form	Met	As described earlier (SLO1), converting clinicals from 6 to 12 hours will streamline the workflow so students will be more successful in making reasonable clinical judgments using nursing processes.
SLO 3 - The PN graduate will be able to practice safe administration of medications, including at the clinical sites.	Final Clinical Evaluation Form	98% of students will practice safe administration of medications based on the Implementation section of the Final Clinical Evaluation Form.	90% of students practice safe administration of medications based on the implementation section of the Final Clinical Evaluation Form.	Met	We will provide more open labs to practice safe administration of medications prior to clinical setting. Changing clinicals from 6 to 12 hours will also provide additional opportunities to practice safe administration of medications in the
