

ADMISSION STANDARDS: Your initial enrollment into the Respiratory Care Program is contingent upon your maintaining a 2.0 (on a 4.0 scale) cumulative grade point average and other minimum admission standards by the first day of classes. By the first day of classes, you must have the following courses, or the equivalent courses, completed in order to maintain your admission status: BIO 137, BIO 139 (Human Anatomy and Physiology I & II) and the mathematics requirement, with a grade of "C" or better. **Students failing to meet the academic standards or complete the prerequisite courses will not be able to enter any of the respiratory care courses.**

Questions about equivalent courses should be directed to your Respiratory Care Program advisor.
