

## Orientation

To get students off to a good start, we like to have a program orientation. The orientation will occur during the Tuesday lab time of the first day of classes. Even if you are scheduled for Thursday lab, we ask that everyone attend the orientation. **Note that this is in addition to the normally scheduled lecture courses that will begin on Tuesday, August 15th in room 342 of the Oswald Bldg. beginning at 8:00 am.**

The orientation will take place on August 15th after lecture courses at around 12 noon in the program classroom/lab 342 of the Oswald Bldg. We have selected this day and time because everyone, including the 2nd year students, will be available to meet. Lecture classes on Thursday will occur as listed in the schedule. There will be no lab on Thursday. The 2nd year students and faculty will put together a nice lunch including drinks, desserts etc... After lunch we have the following activities scheduled:

- Meet with recent 2<sup>nd</sup> year students to discuss strategies for success
- Get to know one another activities with classmates and faculty
- Initial orientation to the program and clinical

The orientation will conclude at 3:30 pm. **Because essential program information will be presented during the orientation, please make arrangements so you will be able to attend the entire orientation.**

**The initial clinical orientation will occur on Friday, August 18th beginning at 8:30 am in room 342 of the Oswald Bldg.**
