

<https://kctcsbluegrass.edready.org/home>

EdReady is a **free** online tutorial and test preparation program for mathematics! Students that test into a developmental math course can use Edready for college math preparation and then retake the math placement exam at BCTC for free. Instead of paying tuition for developmental math courses, students can learn using Edready at no cost. The goal is for students to bypass developmental math courses in order to complete college level math requirements in a shorter time frame.

Student Instructions:

1. Sign up at <https://kctcsbluegrass.edready.org>
2. Add the goal BCTC Math Preparation
3. Once you click on your goal, you will be asked to take an initial assesement
4. Your customized study plan now contains the units that need to be studied
5. Click on a unit to get started
 - Units include videos, tutorials, examples, excercises, and quizzes
6. Successful completion of a unit quiz will increase your overall score
7. When you reach your goal score, contact Advising and Assessment to schedule a free math placement exam.
